

How to use this content:

Walls

- There are four (4) Curtain Wall types that comprise the Pivot and Bifold panel options.
- They are named and configured to match available options.
- They are set to automatically embed within host walls.
- Copy/Paste or Transfer Project Standards into your project.
- Sheets found within this Revit model mimic standard configurations offered.
- Please consult Landquist & Son Inc. brochure for further information.

Walls

Basic Wall

Curtain Wall

Landquist Bifold Closet - Multi Panel

Landquist Bifold Closet - Single Panel

Landquist Pivot Closet - Double Panel

Landquist Pivot Closet - Single Panel

Doors

- Use the Offset parameter for each panel to control its location.
 - Manufacturer recommends 1/2" from host wall finish face to exterior face of panel top track.
- There are Yes/No parameters to control each panel within the Constraints of Properties.
 - Hovering over parameter names will display tips on how to use each.
